

Medicinski fakultet u Rijeci

**IZVEDBENI NASTAVNI PLAN
2022/2023**

Za kolegij

**Anatomical Dissection of the Topographic Regions of
the Head and Neck**

Studij:	Medical Studies in English (R) (izborni) Sveučilišni integrirani prijediplomski i diplomski studij
Katedra:	Zavod za anatomiju
Nositelj kolegija:	izv. prof. dr. sc. Arbanas Juraj, dr. med.
Godina studija:	5
ECTS:	1.5
Stimulativni ECTS:	0 (0.00%)
Strani jezik:	Mogućnost izvođenja na stranom jeziku

Podaci o kolegiju:

The aim of the subject is to teach the students, through theoretical and practical learning, how to independently dissect given anatomical structures of the topographical regions of the head and neck of man. Independent dissection of the head and neck will give to the students much more detailed insight into the contents of the topographic regions, because during regular anatomy classes, the students learn from already done, dissected structures. In this way, they will better understand the relationship between individual structures in the topographic regions of the head and neck. For students of the 5th year, who are attending classes in surgery, otorhinolaryngology and maxillofacial surgery and stomatology, the anatomical dissection can only help to better recognize and locate certain anatomical structures that are of interest to them.

Popis obvezne ispitne literature:

Detton AJ. Grant's dissector 16th Edition. Wolters Kluwer, Philadelphia, USA, 2017.

Atlas of human anatomy

Popis dopunske literature:

Tank PW. Grant's dissector 13th Edition. Lippincott Williams & Wilkins, Philadelphia, USA, 2005.

Lisowski FP. A Guide to Dissection of the Human Body 2nd Edition. World Scientific Publishing, Singapore, Indonesia, 2003.

Nastavni plan:

Obveze studenata:

Regular attendance and active participation in teaching and fulfilment of the given tasks in practicals.

Ispit (način polaganja ispita, opis pisanog/usmenog/praktičnog dijela ispita, način bodovanja, kriterij ocjenjivanja):

During the lecture, students' knowledge will be checked through the conversation

The results of practical work will be analysed, depending on the fulfilment of the technical criteria of the anatomical dissection and depending on the number of dissected, given anatomical structures.

Ostale napomene (vezane uz kolegij) važne za studente:
