Nutrition and Immune Response: Truths and Misconceptions

Studij:	**Medical Studies in English (R)** (izborni) Sveučilišni integrirani prijediplomski i diplomski studij
Katedra:	**Katedra za fiziologiju, imunologiju i patofiziologiju**
Nositelj kolegija:	**prof. dr. sc. Mrakovčić-Šutić Ines, dr. med.**
Godina studija:	**4**
ECTS:	**1.5**
Stimulativni ECTS:	**0 (0.00%)**
Strani jezik:	**Mogućnost izvođenja na stranom jeziku**

Podaci o kolegiju:

The aim of this elective course is to provide students the opportunity to take a knowledge about the possibilities of modern ways in nutrition and its interaction with immune response. Regulated inflammatory responses are essential to remain healthy and maintain homeostasis. Inflammatory responses can brocked this regulatin and may cause different chronic inflammatory rsponses and contribute to the perpetuation and progression of disease. Typical features of chronic inflammation underlying the pathophysiology of several disorders with loss of barrier function, responsiveness to a normally benign stimulus, infiltration of inflammatory cells into cell compartments where they are not normally found in high concentrations and overproduction of cytokines, chemokines, oxidants, eicosanoids and matrix metalloproteinases (MMPs). Various dietary components (for example omega-3 fatty acids, antioxidant vitamins, prebiotics and probiotics) may modulate predisposition to chronic inflammatory processes (especially low-grade inflammation that is characteristic for obesity and other pathological conditions) and may have a role in therapy. Changes in gut barrier function and anti-inflammatory responses may lead to developing of many autoimmune and inflammatory diseases. Many different factors associated with a Western lifestyle such as an unbalanced diet (low intake of fruits and vegetables, polyphenols and other antioxidants), pollution, psychological stress etc. may reduce the efficiency of antioxidant defences, shifting the redox balance and consequently increase the risk of inflammatory responses which may become chronic. It is very important to know the mechanisms and function of many dietary components to benefit to human health.

o Understand and explain the specifics of innate and acquired immune responses in different eating habits

o Explain the different pathophysiological pictures of diseases that require special forms of nutrition and are accompanied by changes in the immune response

o Explain the guidelines of therapies based on different types of diet

- The influence of diet on innate and acquired immune response
- The influence of diet on the development of the inflammatory process
- Nutrition and obesity
- Nutrition and development of cardiovascular diseases
- Specifics of diet in autoimmune diseases
- Nutrition and tumour diseases
- Nutrition and osteoporosis
- Nutrition and COVID-19
- Nutrition and fibromyalgia

Nastavni plan:

Predavanja popis (s naslovima i pojašnjenjem):

L1: Nutrition and Immunity-introduction

Understand the regulated inflammatory response and its role in maintaining health and homeostasis.

L2: Nutrition, obesity and immunity

Inflammatory responses can affect the immune response and contribute to the development and progression of disease

L3: Nutrition, physical activity and immunity

Explain the interaction between physical activity, immune response and diet

L4: Inflammatory Diseases Proceses and Interactions with Nutrition

Changes in gut microbiota, as well as changes in gut barrier function and anti-inflammatory responses can lead to the development of many autoimmune and inflammatory diseases.

Seminari popis (s naslovima i pojašnjenjem):

S1: Changes in nutritional status impact immune cell metabolism

Understand changes in innate and acquired immunity during different dietary habits

S2: Fermented foods

Describe the characteristics of fermented foods and their relationship with the immune response

S3: Flavonoids

Explain the characteristics of flavonoids

S4: Nutrition and IBD

Explain the specifics of nutrition in patients with IBD

S5: Nutrition in patients with chronic pain

The influence of nutrition on the characteristics of the inflammatory pain process

S6: : Immunity and Micronutrients change over the life course

Explain the influence of micronutrients on the immune response

S7: Nutritional and Nutrigenetic factorson Immunity in COVID-19

Explain the principles of nutrigenomics

S8: Phytochemicals

Explain the characteristics of phytochemicals

S9: Nutrition and anticancer immunity

Explain the influence of nutrition on the anticancer immune response

Obveze studenata:

Regular class attendance, writing a seminar paper

Ispit (način polaganja ispita, opis pisanog/usmenog/praktičnog dijela ispita, način bodovanja, kriterij ocjenjivanja):

The final grade of the student's knowledge is formed on the basis of the grade acquired during the course (70% of the total grade) and on the basis of the knowledge test at the final exam (30% of the total grade). During the classes, the student's work will be evaluated and evaluated on the basis of a seminar paper that students make in small groups and present during the seminar.

Ostale napomene (vezane uz kolegij) važne za studente:

SATNICA IZVOĐENJA NASTAVE 2023/2024

Nutrition and Immune Response: Truths and Misconceptions

Predavanja (mjesto i vrijeme / grupa)	**Seminari** (mjesto i vrijeme / grupa)
14.05.2024	

L1: Nutrition and Immunity-introduction:
• ONLINE (19:30 - 21:45) [214]
  ○ NaIRTAM
 	
L2: Nutrition, obesity and immunity:
• ONLINE (19:30 - 21:45) [214]
  ○ NaIRTAM	

prof. dr. sc. Mrakovčić-Šutić Ines, dr. med. [214]	
17.05.2024	

L4: Inflammatory Diseases Proceses and Interactions with Nutrition:
• ONLINE (10:00 - 11:30) [214]
  ○ NaIRTAM
	S1: Changes in nutritional status impact immune cell metabolism:
	• ONLINE (11:30 - 16:45) [214]
	  ○ NaIRTAM
	
	S2: Fermented foods:
	• ONLINE (11:30 - 16:45) [214]
	  ○ NaIRTAM
	
	S3: Flavonoids:
	• ONLINE (11:30 - 16:45) [214]
	  ○ NaIRTAM

prof. dr. sc. Mrakovčić-Šutić Ines, dr. med. [214]	
03.06.2024	
	S4: Nutrition and IBD: • ONLINE (20:00 - 22:15) [214] ○ NaIRTAM
prof. dr. sc. Mrakovčić-Šutić Ines, dr. med. [214]	
25.06.2024	

	S5: Nutrition in patients with chronic pain:
	• ONLINE (15:30 - 21:30) [214]
	  ○ NaIRTAM
	
	S6: : Immunity and Micronutrients change over the life course:
	• ONLINE (15:30 - 21:30) [214]
	  ○ NaIRTAM
	
	S7: Nutritional and Nutrigenetic factorson Immunity in COVID-19:
	• ONLINE (15:30 - 21:30) [214]
	  ○ NaIRTAM
	
	S8: Phytochemicals:
	• ONLINE (15:30 - 21:30) [214]
	  ○ NaIRTAM

prof. dr. sc. Mrakovčić-Šutić Ines, dr. med. [214]	
26.06.2024	

	S9: Nutrition and anticancer immunity: • ONLINE (20:00 - 21:30) [214] ○ NaIRTAM
prof. dr. sc. Mrakovčić-Šutić Ines, dr. med. [214]
