

Faculty of Medicine in Rijeka

Curriculum 2023/2024

For course

Biostatistics

Study program: Medical Studies in English (R)

Department: University integrated undergraduate and graduate study

Department of Medical Physics and Biophysics

Course coordinator: prof. dr. sc. Žauhar Gordana, prof. fizike i kemije

Year of study: 2
ECTS: 1.5
Incentive ECTS: 0 (0.00%)

Foreign language: Possibility of teaching in a foreign language

Course information:

Biostatistics is a compulsory course on the second year of the Integrated Undergraduate and Graduate University Study of Medicine, with 15 hours of lectures and 15 hours of exercises. It is held during IV. Semester. Lectures are held in lecture hall number 9, and practical in the computer classroom at the Faculty of Medicine. The estimated duration of course is 7 weeks.

COURSE STRUCTURE Formal lectures: 15 hours Practicals: 15 hours Total hours: 30

The objective of the course is to teach students about statistical reasoning, when and how to apply and how to interpret the basic statistical tests. In this way students will develop the ability of quantitative approach to data gathering, analysis and interpretation within the fields of biological sciences and humanities, which is the necessary requirement for their professional development, ability to critically follow the scientific and technical literature and participate in its creation.

List of assigned reading:

Triola M.M, Triola M.F, Biostatistics for the Biological and Health Sciences, Pearson, 2018.

List of optional reading:

Dawson B, Trapp R.G, Basic & Clinical Biostatistics, McGraw-Hill, 2004.

Curriculum:

```
Practicals list (with titles and explanation):
 P1-2 Preparing and Writing Data In The Data Processing Program.
 P3 Visualising of Data. Histograms. Pie Charts. Time Series Graph.
 P4 Descriptive Statistics. Calculation of Basic Measures of Centre and Variation of the Numerical Data.
 Graphic Representation of Empirical Distribution
 P5 Testing of Data Distribution for Normality with Kolmogorov-Smirnov test
 P6 z-Scores (determination of the position for each result in the normal distribution with z-scores)
 P7 Comparing the means of two independent samples with Student t-test
 P8 Comparing the means of two dependent samples
 P9 Analisis of Variance (ANOVA)
 P10 Correlation and regression
 P11 Comparison of Qualitative Data
 P12 The Chi-squared Test
 P13 Non-Parametric Methods
 P14 Repeating and Testing of Knowledge
 P15 Repeating and Testing of Knowledge
Lectures list (with titles and explanation):
 L1 Introduction to Statistics. Statistics in Medicine. Scales of Measurement.
 L2 Presenting of Data in Tables and Graphs. Summarizing and Displaying Numerical Data in Graphs.
```

Empirical Distribution and Data Grouping Within Intervals of a Continuous Variable and Classes.
.3 Measures of central tendency - arithmetical mean, mode, median, geometrical mean and harmonic nean.
.4 Measures of Variation - range, mean deviation, variance, and standard deviation. Variability coefficient. Percentiles, deciles and quartiles.
.5 Normal Probability Distributions. The position of a result within the group (z-Scores).
.6 Population and the sample. Inferences about the population based on sample-results. Confidence imits.
.7 Statistical significance of differences between the means of mutually independent samples.
.8 Correlation between variables.
.9 Regression analysis.
.10 Statistical significance of differences between the means of mutually dependent (correlated) samples.
.11 Analysis of Variance (ANOVA).
.12 Analysis and Comparison of Qualitative Data. Proportions. Inferences about Two Proportions: ndependent Samples.
.13 Chi-Square Test. Mc-Nemar test (Chi-Square Test for Dependent Samples).
.14 Written Knowledge Assessment
.15 Final Lecture and Preparation for the Exam

Student obligations:

Students' obligations are course attendance and active participation in all practicals.

Exam (exam taking, description of the written/oral/practical part of the exam, point distribution, grading criteria):

Evaluation of students' work:

Students can obtain a total of 100 credits (a maximum of 70 credits during the course and a maximum of 30 credits on the final exam). Students are allowed to take the final exam if they acquire a minimum of 35 credits during the trimester.

Evaluation of Students' Work During the Course (Maximum 70 credits) a) Active participation during practicals (3 credits) b) Midterm exam (32 credits) c) Colloquium (35 credits)

The attendance at lectures and practicals is mandatory. If necessary, a student can be absent from 30% of the classes.

a) Active participation during seminars:

During the practicals student participation and dedication will be monitored. At the end of each practical, students are also given homework assignments. A maximum of 3 points is awarded through active participation. Activities scoring is done in the following way

number of correctly assigned homework assignments	credits
0	0
1	1
2	2
3	3

b) Midterm Exam (32 credits)

Students have to pass the written midterm exam (in form of a test consisting of 3 problem tasks). In order to pass the midterm exam students have to score at least 50% (16 credits)

c) Colloquium from practical (35 credits)

Practicals end up with a colloquium. The colloquium examines the resolution of statistical tasks in the computer program "Statistica". It is possible to collect up to 35 credits.

Final exam:

Students have to pass the written exam (in form of a test consisting of 29 questions, each containing 5 statements). In order to pass the written part of the exam students have to score at least 50% (15/29 correct answers).

Assessment of the written part of the final exam:

Number of correct answers	Credits
15	15
16	16
17	17
18	18
19	19
20	20
21	21
22	22
23	23
24	24
25	25
26	26
27	27
28	28
29	30

The ECTS grading system is defined by the following criteria:

A (5) - 90-100 credits B (4) - 75-89,9 credits C (3) - 60-74,9 credits D (2) - 50-59,9 credits

Other notes (related to the course) important for students:

Retaking the course: A student who acquires less than 35 credits during the course has failed the course and is graded with F
and must retake the course BIOSATISTICS.

COURSE HOURS 2023/2024
