

Faculty of Medicine in Rijeka

Curriculum 2025/2026

For course

An Introduction of Philosophy in Medicine

Study program: **Medical Studies in English (R)** (elective)
University integrated undergraduate and graduate study

Department: **Department of Humanities and Social Sciences in Medicine**

Course coordinator: **doc. dr. sc. Mijatović Franjo**

Year of study: **1**

ECTS: **1.5**

Incentive ECTS: **0 (0.00%)**

Foreign language: **Possibility of teaching in a foreign language**

Course information:

Introduce students to the general foundations of conceptual, metaphysical, epistemological, sociological, cultural, and political issues through presentation and active participation in discussions about medicine and healthcare today, based on reflections from the past and challenges for the future.

Analyze and critically interpret key concepts in the study of the relationship between philosophy and medicine: health and illness; three theories of causality in disease; holism and reductionism in medicine; controversial diseases; evidence in medicine; objective and social structures of science and medicine; evaluation of diagnosis and screening; research medical priorities; public health issues; student presentations.

After completing the course, students will be able to:

Identify and explain the main philosophical questions that arise in everyday life, including health, illness, pain, vulnerability, dignity, etc.

Critically evaluate arguments in the philosophy of medicine and healthcare.

Demonstrate a deep and systematic understanding of the philosophical approach to medicine.

Justify professionalism in various healthcare situations.

Write a clear and well-argued seminar paper.

Use relevant terms and argumentation in oral and written forms.

Curriculum:

Lectures list (with titles and explanation):

Introduction to the Philosophy of Medicine: Health and Disease

Introduce students to the course "Introduction to the Philosophy of Medicine." Differentiate and define the concepts of health, illness, pain, and suffering.

Three Theories of disease causality

Investigate three models or theories of disease causality and disease categorization. Highlight the key distinction between the monocausal model of disease and the multifactorial model of disease. Explore what precision medicine entails and assess its potential for improving healthcare.

Seminars list (with titles and explanation):

Holism and Reductionism in Medicine

Understand disease in terms of microphysiological parts and processes. Define diseases based on abnormalities in microphysiological parts and processes, and indicate which interventions should be directed towards these microphysiological elements. Consider that individuals are more than just biological features when discussing diseases and potential interventions.

Controversial Diseases

Appeal to well-grounded general theories of disease and models of disease causality. Study and evaluate some controversial diseases, and assess the concept of medicalization while providing examples of culturally conditioned illnesses.

Objective and Social Structure of Science and Medicine

Consider biases in publishing and conflicts of interest arising from funding medical research, and identify problems related to the influence of values in scientific research. Mitigate these issues by implementing epistemological tactics at the social level.

Effectiveness and Skepticism in Medicine

Examine various ways in which causal inference goes beyond direct conclusions from randomized trials. Evaluate the shortcomings and advantages of two theories of scientific inference: frequentism and bayesianism.

Public Health Issue

Explore the social factors influencing health and disease, and assess the impact of social epidemiological studies that have contributed to improvements in health throughout history, such as reducing child mortality rates, extending life expectancy, and lowering rates of infectious diseases. Emphasize the importance of preventive medicine.

Student Presentations

Each student will independently present their work to the entire group, with evaluation of presentation elements.

Student Presentations and Concluding Lecture

Each student will independently present their work to the entire group, with evaluation of presentation elements. Highlight necessary measures to prevent potential ethical violations in the work environment and setting.

Student obligations:

Regular attendance of lectures / work-hops; 2. Activity in lectures and work-shops; 3. Final (written) exam. During the course of studies, according to lecturer's instructions, students will have to develop and defend their paper (in the form of discussion), based on lectures, practical work and knowledge acquired. A particular attention will be paid to the student's ability to use the acquired knowledge in their work and analysis of the selected topic (problem). In addition, students must prepare a presentation that would reflect a freely chosen question from the area of introduction to the philosophy of medicine. Finally, students will take an exam from the introduction to the philosophy of medicine. The final grade will be graded according to a grading system from 1 to 5. Assessment is carried out in accordance with the Rules of Assessment of the Faculty of Medicine, University of Rijeka: attendance is 10 (%), presentation of seminar paper 40 (%), and final written essaz 50 (%).

Exam (exam taking, description of the written/oral/practical part of the exam, point distribution, grading criteria):**Other notes (related to the course) important for students:**

Students are expected to attend classes regularly, actively participate in seminars and pass the final exam. Attendance records are determined by roll call at the beginning of class. Student absences are justified with a medical excuse. Except during consultations and by appointment, the teacher is also available via e-mail.

COURSE HOURS 2025/2026

An Introduction of Philosophy in Medicine

Lectures (Place and time or group)	Seminars (Place and time or group)
21.10.2025 Introduction to the Philosophy of Medicine: Health and Disease: • ONLINE (17:15 - 18:45) [1342] ◦ AIPM doc. dr. sc. Mijatović Franjo [1342]	
31.10.2025 Three Theories of disease causality: • ONLINE (12:00 - 14:00) [1342] ◦ AIPM doc. dr. sc. Mijatović Franjo [1342]	
04.11.2025 doc. dr. sc. Mijatović Franjo [1342]	Holism and Reductionism in Medicine: • ONLINE (17:00 - 19:00) [1342] ◦ AIPM
12.11.2025 doc. dr. sc. Mijatović Franjo [1342]	Controversial Diseases: • ONLINE (16:00 - 18:00) [1342] ◦ AIPM
03.12.2025 doc. dr. sc. Mijatović Franjo [1342]	Objective and Social Structure of Science and Medicine: • ONLINE (17:00 - 19:00) [1342] ◦ AIPM
18.12.2025 doc. dr. sc. Mijatović Franjo [1342]	Effectiveness and Skepticism in Medicine: • ONLINE (18:00 - 20:00) [1342] ◦ AIPM
16.01.2026 doc. dr. sc. Mijatović Franjo [1342]	Public Health Issue: • ONLINE (18:15 - 20:15) [1342] ◦ AIPM
30.01.2026	

Student Presentations:
• ONLINE (16:00 - 20:00) [1342]
◦ AIPM

Student Presentations and Concluding Lecture:
• ONLINE (16:00 - 20:00) [1342]
◦ AIPM

doc. dr. sc. Mijatović Franjo [1342]
