**Podaci o kolegiju:**

The main goal of the course is to introduce the students to the complete pathology of the uterus and its impact on women's health, especially reproductive health. Moreover, the goal is to introduce students to the latest diagnostic methods in detecting cervical pathology and accepted treatment protocols. In addition to diagnosing and treating cervical diseases, special attention will be paid to disease prevention and responsible sexual behavior.

**Ishodi učenja:**

Students will be able to educate the population, mainly the younger ones on how to protect themselves from sexually transmitted diseases, to spread awareness about sexually transmitted diseases as a public health problem. They will also be able to specially search for specific cervical pathologies and inform the patient about treatment options.

**Popis obvezne ispitne literature:**

Mayeaux, EJ. Modern colposcopy textbook and atlas, American Society to Colposcopy and cervical pathology

**Popis dopunske literature:**

King K. Holmes, P. Frederick Sparling Sexually transmitted disease
